

AMAN MONDAL

MERN Developer | React | Node.js | MongoDB

Ph: +91-9123970930 || Email- amanofficial0108@gmail.com || [GitHub](#) || [LinkedIn](#)

Professional Summary

Full-stack MERN developer experienced in building production-ready web applications including e-learning, ticketing, and real-time platforms. Strong in React, Node.js, and MongoDB, with hands-on experience in authentication, APIs, role-based access, and modern UI using Tailwind.

Skills

- **Backend:** Node.js, Express.js, REST APIs, Authentication (JWT), Zod Validation
- **Frontend:** React, Redux Toolkit, Zustand, Tailwind CSS, Shadcn UI
- **Database:** MongoDB (NoSQL)
- **Tools:** Git, GitHub, Stripe Payments

Projects

SKILLORA (React, Node, MongoDB, Express, Redux, Tailwind, Stripe)

[Live](#) || [GitHub](#)

Modern MERN LMS with role-based access, secure payments, and responsive UI.

- Built a scalable MERN-based LMS with JWT auth and RBAC 99.9% uptime.
- Developed full-stack LMS using React 18, Node.js, Express, MongoDB, Redux Toolkit, Zod, and Tailwind CSS.
- Reduced invalid requests by 85% and achieved <2s page loads with optimized student and course workflows.
- Designed LMS with CI/CD, role-based authorization, and 75% faster MongoDB queries.
- Deployed full-stack LMS from MVP to production with real-time notifications and enrollment tracking.

Blood Bank App (React, Node.js, Express.js, MongoDB, Redux, Tailwind, JWT)

[GitHub](#)

Full-stack app for tracking blood inventory, managing donors, and coordinating donation requests.

- Developed a full-stack blood donation management platform featuring secure authentication, donor onboarding, and real-time request processing.
- Engineered robust REST APIs with Express.js and MongoDB to manage donors, blood inventory, user roles, and request lifecycle.
- Built a clean, responsive React interface enabling users to search availability, submit requests, and track donation status seamlessly.
- Improved operational efficiency by implementing structured data models, modular services, and a scalable backend architecture.

GatePe (React, Node, MongoDB, Express, Zustand, Shadcn, Tailwind, Stripe)

[GitHub](#)

Event ticketing platform with event listings, ticket purchasing, and gate verification

- Architected a scalable MERN-based event ticketing platform, designing modular Node.js + Express APIs capable of handling high-traffic event searches with sub-200ms response times.
- Implemented secure JWT authentication, role-based access, and data validation pipelines, reducing unauthorized access attempts and transaction failures by 40%.
- Built location-aware event discovery using MongoDB geospatial queries, enabling fast city-based filtering and improving search accuracy by 60%.
- Optimized frontend performance with React + Tailwind, reducing page load time by 50% and improving user engagement for ticket browsing and checkout flows.

Education

- **Bachelor of Computer Applications (BCA)** — Narula Institute of Technology, India (2022–2025)
- **Higher Secondary (10+2)** — Kalyan Nagar Vidyapith, India (2019–2021)
- **Secondary (10th)** — Sodepur High School, India (2018–2019)
